Objective

Seeking a Software Engineer / Specialist Programmer position where I can utilize my expertise in full-stack application development, data structures & algorithms, and modern software engineering practices to design, develop, and deploy scalable, secure, and efficient software solutions.

Personal Details

Date of Birth: 15/10/2003

Nationality: Indian

Education

Course / Degree	School / University	Grade / Score	Year
Secondary secondary	Excellence School Gwalior	91%	2019
Higher Secondary	Excellence School Gwalior	90%	2021
Diploma 3year CSE	Dr BR Ambedkar Polytechnic College	7.3 CGPA	2021-2024
B.Tech CSE	ITM University	6.67 CGPA	2024-2027

Skills

- Programming Languages: C, C++, Java, JavaScript
- Web Development: HTML, CSS, JS, React, Redux, Redux-toolkit, Bootstrap, Node.js, Express.js, MongoDB
- Tools: Git, GitHub, REST APIs, Postman, Cloudinary
- Data Structures & Algorithms: Solved 500+ LeetCode problems covering Arrays, Strings, Linked Lists, Trees, Graphs, Dynamic Programming, Greedy, Binary Search and Hashing

Experience

- Developed and deployed full-stack web applications using modern frameworks and tools.
- Designed and managed frontend and backend architectures for seamless performance and scalability.
- Implemented secure user authentication and authorization systems.

Projects

A Quiz Application

Designed and implemented a responsive web application that allows users to register, log in, and participate in quizzes securely. Integrated authentication, session management, and custom anti-cheat features to enhance integrity and usability. Developed with a full-stack architecture, combining front-end, back-end, and database technologies to deliver a scalable and production-ready solution.

Virtual File System

Developed a full-stack, fully responsive web application enabling users to upload, view, and download files securely using cloud storage integration (Cloudinary). Implemented authentication, login/signup functionality, and session management to ensure user data isolation and privacy. Built with a complete front-end, back-end, and database architecture, providing real-world functionality and seamless cloud-based file management.

HR Management System

Developed a fully functional HR Management System with secure employee authentication and email verification features. Implemented functionalities for adding and removing employees, leave request management, HR approval workflows, notifications, and role-based access control. Integrated AI-based features to assist HR operations and improve employee management efficiency.
